

## User Query

I have an image '08773.jpg', and I'd like to know more about what's in the image. Once you determine that, can you provide me with a brief overview of the subject from Wikipedia ?

I have an audio file '8455.flac' and it seems to describe an event. Can you tell me where did this event take place based on the content?

I just heard about a movie called Moonlight that released in 2016. Can you find out some details about this movie and then tell me who directed it?

I need an illustration for my children's book. I've imagined a scene where there's a large group of little kids and adults at a long table with blue plates. After we have the image, we also need to identify all the objects, then add labels to them.

I've got an image 2329676.jpg. Could you find and highlight the dog in the picture, by replacing it with a smiling\_face emoji? I think it would be great for my upcoming blog post on traveling with pets.

## Executed Plan
